As one of the largest glass and metal suppliers in the nation, PRL's goal is to provide our customers with the most complete line of glass entry systems available, thus offering the convenience and benefits of buying from a single source supplier. To that end, we continue to develop and improve our product lines. One of our more recently developed products, our Accordion Aluminum Bi-Fold Door line, is earning its place as one of our top performing products thus far!

The demand for "Accordion" doors is increasing daily. We invite you to join in this growing "Indoor/Outdoor Living" sliding door market! Our Bi-Fold system provides superb sound control, excellent air and water protection, ease in operation and is hurricane impact rated. Added to this outstanding product is the advantage of production times that are the fastest in the industry! Please visit our website or contact our knowledgeable staff for more information.

PLEASE NOTE: PRL continuously improve products design and performance, we reserve the right to make changes without notice.

Accordion Bifold

- Versatile
- In-line / Multiple Panels
- Custom Configurations
- Weather Resistant
- Thermally Broken
- Dual Tone Finish feature

Specifications

In a single direction:

- Maximum Panel Weight -220 lbs each panel
- Minimum Panel Width -24"
- Maximum Panel Width - 42"
- Maximum Panel Height -120"
- Door Thickness - 2 1/2"
- Maximum # of Doors: 8 each way = 16 panels = 45 ft total.

Extrusions: Aluminum 6063-T5.

Finishes:

- Clear and Bronze anodized finishes Class 1 .
- Standard Mill Finish available for custom colors.
- Powder Coat : White
- Custom finishes available: Wood Grain finishes available

Hardware: Stainless Steel Components .

Lever Lock Sets: A Set- 316 Stainless Steel, B Set- Powder Coat over Brass.

Multi-point Door Locks: Faceplate, latch and hooks

Custom Bi-Fold with Reflective Glass

Configurations:

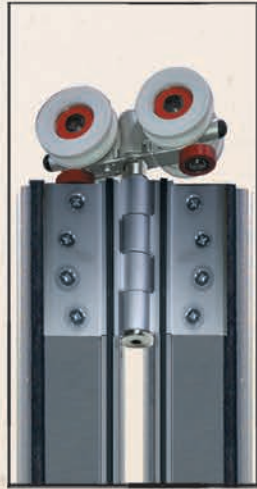

- 2L
- 3L1R
- 2L2R
- 3L3R
- Custom
- 1L2R
- 4L
- 4L1R
- 8R

NOTE: When using maximum panel width & height 42" x 120" panel may exceed maximum panel weight of 220 lbs, consult PRL for details. Panel heights of 120" and over may fall under the weight restrictions.

Standard Features

Accordion Bi-Fold doors satisfy a wide spectrum of design and functionality requirements. Accordion are flexible, offered as a top hung system with a floor guide and provide reliable weather protection with an innovative seal system.

- 2"H x 4 3/4"W Head Track

- Top Hung Roller

- 3 1/2"H x 2 1/2"W Top Thermal Break & Single Glass Stop Rails

- Integral Weather Seal Interlock System

- High Performance 1" IG Glazing

- Perimeter Weatherstripping

- 10"H x 2 1/2"W Bottom Thermal Break & Single Glass Stop Rails (Also Available 3 1/2"H)

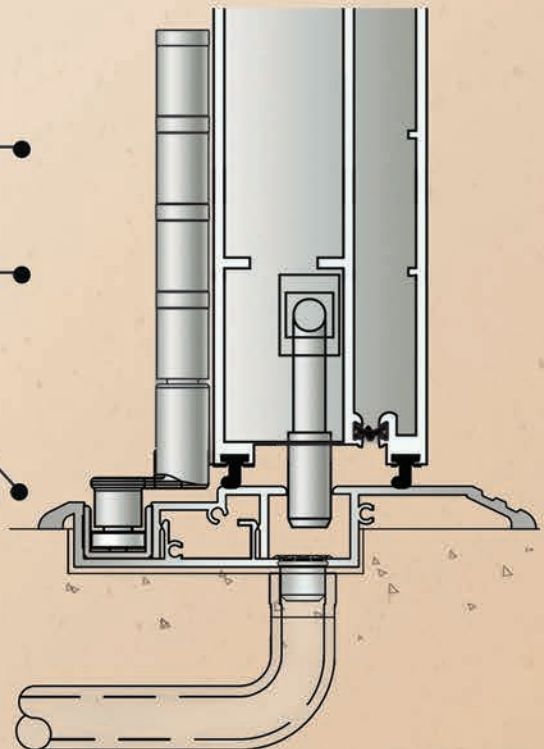

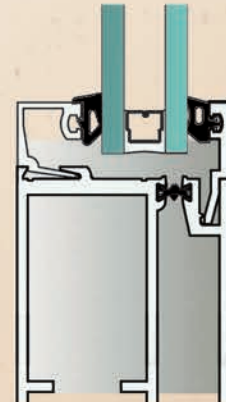

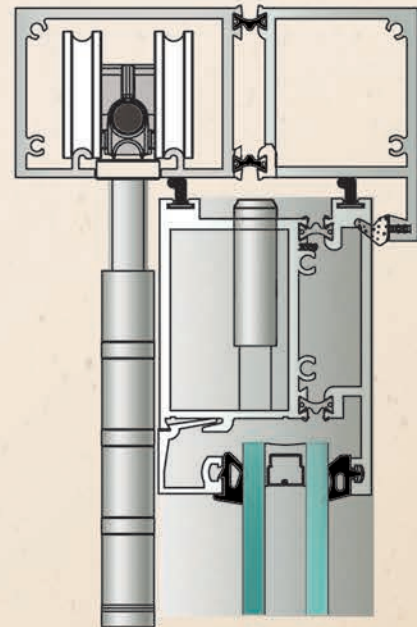

- 3 1/2"H x 2 1/2"W Vertical Thermal Break/Single Glass Stop Stiles

- PRL Hinge unibody design/ integral weatherstripping

- Sill / Bottom Track 1/2"H x 5 7/8"W ADA Sill

Also Available:

- 1 3/16"H x 4 3/4"W High Sill
- 13/16"H x 6 1/4"W Low Sill.

Top Hung Ruby Slider System

PRL's Ruby Interior Sliding System is a contemporary top hung stainless steel sliding door system that offers a smooth and easy operation. This frameless glass system can be used with single or double doors for residential applications, or customized to suit other applications.

Our Ruby slider uses compact exposed components with surface flush mount fasteners that provide a unique, edgy look. The support tube is secured with offset mount brackets on glass and with adaptors can be wall mounted. Compact heavy duty track supports reduce the gaps between glass surfaces panels. The frameless transparency of this system creates visually roomier spaces while providing a means for privacy.

PRL Sliding Systems offer unlimited options wherever valuable space and exposure is critical with:

PRL's Top Hung Movable Glass Wall System provides great design flexibility when the design intent is to maintain a secure but transparent entry that will allow for a partial or complete unobstructed opening during business hours. Heavy duty hardware allows for panels up to 264 lbs. that slide with minimal effort. Swing doors can be incorporated into the system to provide partial entry. The beauty of movable glass walls is that they operate with a single in-line track and can be stacked or hidden away in a convenient closet space. This system is ideal for restaurants, banks, office divider walls or residential patio applications where optimum view is a prime objective.

Max Aluminum Sliders Hospitality Project

90 Degree Multi-Panel System

Door Configurations

PRL's Max' sliding door system is a strong, versatile framed stacking system with a head/sill track, vertical jambs and bottom or top hung roller options that allow unlimited adaptability with configurations ranging from basic single pocket to multi slide configurations for areas where valuable space is critical.

Pocket System

Pocket system is the Max' sliders basic configuration as a one way slider. Hidden application requires designer to consider wall space requirements or the use of an optional custom offset surface mount bracket system for interior applications.

Wall System

This is the intermediate one way inset surface mount frame configuration that maximizes space.

In addition to the standard Max' slider features, it also offers a one piece vertical interlock system that allows sliding multiple panels at one time.

Custom System

Custom Slider doors will add unlimited design advantages on metal, glass and hardware options.

Other optional choices range from custom glass to exotic metal finishes. Stronger reinforced construction permits increasing door heights and widths. Please be advised there are some limitations, please consult PRL Aluminum for details.

Multi-Track System

Multi-Track maximizes the features of the stacking concept as two way, multiple track/panel system or corner configurations with unlimited applications. This configuration offers both standard and special features.

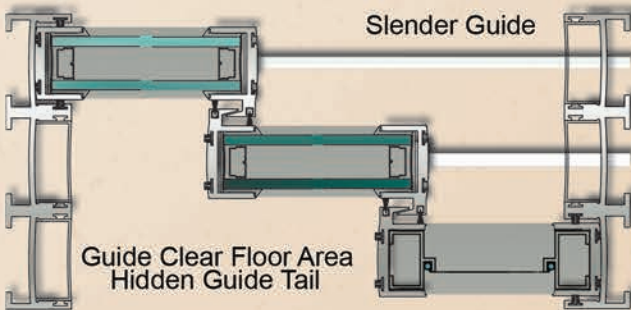

Max Aluminum Slider Top Hung

Slender Floor Guides

Top Hung Max Aluminum Slider

Max' Sliding Doors satisfy a wide spectrum of design and functionality requirements. Max' flexible design provides a top hung system with a slender floor guide that also offers reliable weather protection with an innovative mechanical drop seal system. Our optional concealed guide design eliminates the need for floor guide channels, where an uninterrupted floor condition is desired.

Max Slider with HD Bottom Roller System

Angular Configuration Max Slider Top Hung with Quad Seal Weatherstripping

Angular Configuration

PRL's Angular Configuration Sliders are a versatile top hung or bottom rolling system. Customers are realizing the excellent quality of our Max Sliding doors and the demand for this system has increased tremendously. Our bottom rolling option with jumbo stainless rollers is well suited for large door applications. Interlocking stiles with angular configuration create a moving wall that provides open spaces, easily closed by pulling only the leading panel. The Max Slider provides superb sound control as well as excellent air and water protection, and is hurricane impact rated. It has been tested to industry standards and tried in various climate areas in the US and abroad resulting in great customer satisfaction.

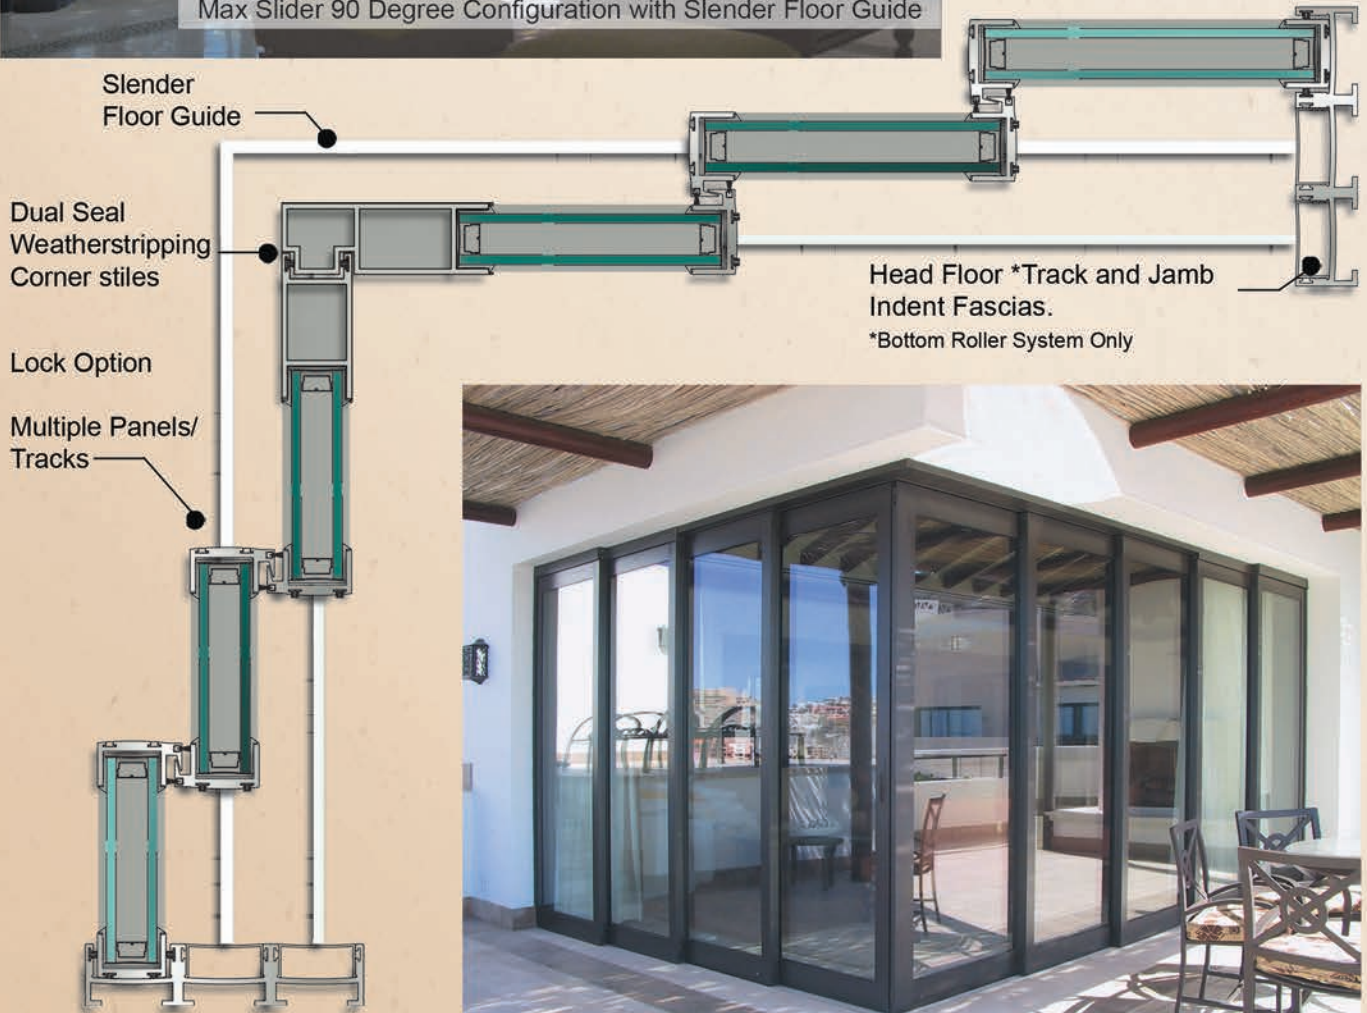

Max Slider in Open Position

Max Slider 90 Degree Configuration with Slender Floor Guide

Max' sliders 90-degree angular configuration are offered for uninterrupted functionality and full extent views.

The slider system can either be two-panel or multi-panel angular bipartition configuration.

Custom/Oversize Configurations

Superb reinforced construction of Max' Sliders, well balanced extrusion properties and hardware qualities provide high torsional values for rigidity on custom oversized width and height applications.

Max Slider Oversize Single Door

Multi-Panel Max Pocket Sliding Door System

PRL's "MAX POCKET SLIDER" Aluminum Multi-panel Sliding Door continues to gain confidence and growth in the "in/outdoor living" sliding door market. Max Pocket sliding doors are designed for large glass openings and to open up the area. The Max Slider provides superb sound control as well as excellent air/water protection and is hurricane impact rated.

A number of different rail and stile profiles are available including an "ultra thin" 1" stile. Glass options include 1/4" to 1 1/8" thick IG. Made in the USA, completely in-house, this product is LEED friendly.

Weather Resistance Features

Max sliding doors are designed to resist above average weather conditions. PRL technology provides weather tight features that minimizes water and air infiltration through the gaps based on the industry standards requirements.

Both PRL Aluminum extrusions and weather stripping technology have proven to be exceptional performers at the laboratory controlled tests conditions and at demanding weather conditions in pacific coastal areas.

Max sliders offer the advantages of effective water-resistance for luxury homes and resort installations.

Some project conditions may require even tighter weather resistance, accessories and architectural alternative designed elements and modifications are also available.

Shower Sliders

Nu-vision shower sliders are offered in 1/4" & 3/8" glass thickness, standard heights or custom configuration to fit almost any project condition. Sliders are assembled with precision engineered metal extrusions for heavy glass load.

Sound Control

PRL "Sound-Control Laminated Glass" is manufactured with a special acoustic grade PVB interlayer.

This unique interlayer has advanced the technology for high-grade acoustic control. When used with IG multiple combinations, extraordinary sound reduction can be obtained.

Custom Interlayer with Fused Wood Veneer

Decorative

PRL's custom Laminated Glass has contributed to complete tasteful and refined décor with unlimited adaptability to unique design concepts, such as:

- Elaborated shapes
- Pattern cutting
- Third party hardware/ elements
- Oversize
- Special glass (Lami thick/ Color combination)

Laminated Glass with Lace Interlayer

Bullet Resistant

PRL's new safety and bullet-resistant glass is thinner and lighter than all other similar products on the market. It uses Makrolon polycarbonate to provide no-spall ballistic protection, while the Marnot anti-weather polycarbonate provides scratch resistance. PRL's bullet resistant product has been tested and conforms to the requirements of UL752.S. It has been design to meet Level 3 ballistic resistance, and is only 1-inch thick.

- 1" Thickness & Lighter Alternative
- Full Range / No Spall Protection
- Polycarbonate Scratch Resistance
- High Ballistic Resistance without Excessive Weight

Safety Bullet Resistant

Structural SentryGlas®

PRL offers fabricated laminated glass with SentryGlas ionoplast interlayer. This is a very durable interlayer with superior resistance to weathering, moisture intrusion and sealant contact problems. It is significantly stronger and more rigid than standard PVB interlayers, making it ideal for impact rated and structural applications.

Rainbow Laminated Glass

Rainbow laminated colors can give you the color you are looking for. Rainbow color interlayer provides 13 standard earth tone color shades that can be used interior and exterior applications. These shades were created to match industry glass tints. The standard colors can be combined to produce over 1,000 transparent or opaque colors. Now architects and designers can design their own color with so many options. The laminated color glass interlayer are fade resistant.

Custom Translucent Wall/Divider in Sapphire Blue

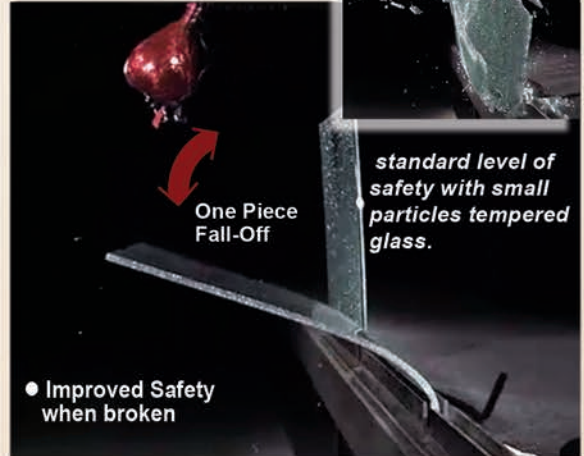

Custom Interior Wall with Custom Colors

PRL laminated glass is ready to assist you with your Tempered, Safety, Sentry, Bullet Resistant, Missile Resistant & Hurricane Resistant glass requirements. PRL offers a lighter, stronger safety glass that can stand up to greater threat levels.

- High Ballistic Resistance without excessive Weight or Thickness
- Thinner Make-Up Fit Security Doors Glazing Pocket

Bullet Resistant

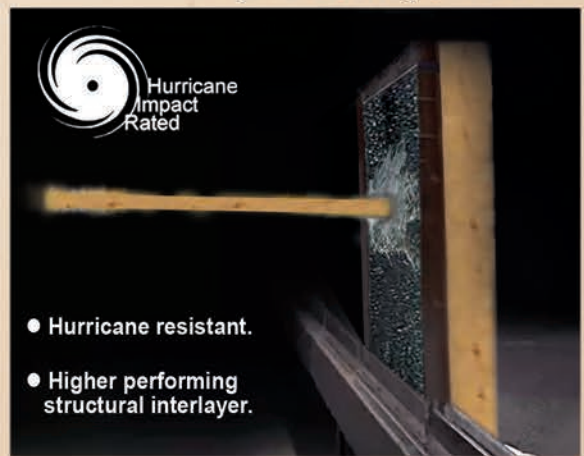

- Improved Safety when broken

Tempered/PVB Laminated Glass

- Tolerates high stress loads (bolted & frameless).
- Reduces deflection & withstands greater wind forces.

Tempered/SentryGlass®

- Hurricane resistant.
- Higher performing structural interlayer.

Missile Impact

Our Max Slider Systems include PRL's Aluminum Extrusions, glass and weather-stripping technology. This technology provides weather tight features that narrows the gap of acceptable water and air infiltration compared to the industry standards/requirements.

ZONE 3 suitable

-  Wind Zone III (200mph)
-  Hurricane-Susceptible Region

Our sliders passed the tests in laboratory controlled conditions.

**test reports available upon request*

Exterior Applications

Curtainwall Infill Panels

Offered with ICD OPACI-COAT 300 water based silicone coat, which is not heat-treated.

Applicable on annealed, tempered glass, & reflective glass products. Available in standard and custom colors, Please contact PRL for details.

SPANDREL glass is available in an almost unlimited range of colors provides a variety of options for interior glass applications. Used on clear, low-iron or reflective glass it can add a radiant, jewel-like color to commercial or residential interior applications.
